The Human Resources Manager
Ecobank Malawi

RE: APPLICATION FOR THE POSITION OF INFORMATION TECHNOLOGY SUPPORT OFFICER

Dear Hiring Manager,

I am writing to express my interest in the Information Technology Support Officer position at Ecobank Malawi. I hold a Bachelor of Science in Information and Communication Technology and currently serve as Lead ICT Technician at Bakhresa Malawi Limited. In my current role, I provide technical support to approximately 97 users, maintain more than 130 network devices, and support over 300 CCTV cameras across three branches while working closely with a team of five ICT technicians.

My experience includes Windows administration, hardware and software troubleshooting, network support, backup verification, documentation, vendor coordination, user support, and preventive maintenance. I am committed to delivering reliable IT services that improve business continuity and user productivity.

I would welcome the opportunity to contribute my technical skills, customer-focused approach, and commitment to continuous improvement to Ecobank Malawi. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your ICT team.

Yours faithfully,

Hussein Mwachikumba

HUSSEIN MWACHIKUMBA

Information Technology Support Officer

Blantyre, Malawi | +265 992 610 320 | hmwachikumbah@gmail.com

PROFESSIONAL PROFILE

IT support technician with three years' experience keeping networks, hardware, and users running across a multi-site company. Currently Lead ICT Technician at Bakhresa Malawi, where I support about 97 users, look after 130+ network devices, and manage a CCTV system of over 300 cameras spread across three branches and staff residences, while supervising a team of five technicians. Comfortable with day-to-day troubleshooting, network support, access control administration, backups, and vendor liaison, along with the documentation that keeps all of it maintainable. I also write small Python scripts to automate repetitive monitoring and maintenance tasks. I work well under pressure and try to leave systems better documented than I found them.

CORE COMPETENCIES

- | | | |
|---------------------------------------|-------------------------------------|---|
| ▪ IT Support & Service Desk | ▪ Incident Response & Resolution | ▪ Windows Administration |
| ▪ Hardware & Software Troubleshooting | ▪ Network Administration (LAN/WAN) | ▪ System Monitoring & Maintenance |
| ▪ Backup Verification | ▪ Documentation & Technical Records | ▪ User Account & Access Administration |
| ▪ Vendor Coordination | ▪ Preventive Maintenance | ▪ IT Security & Antivirus Administration |
| ▪ User Training & Support | ▪ Team Leadership & Mentoring | ▪ Remote Technical Support |
| ▪ Project Participation | ▪ Process Improvement | ▪ Programming Knowledge (Python, PHP, JS) |

PROFESSIONAL EXPERIENCE

Lead ICT Technician | *Bakhresa Malawi Limited, Blantyre* 2023 – Present

- Handle first- and second-line support for around 97 users — hardware faults, software issues, network problems, whatever comes up.
- Look after the network infrastructure: 130+ devices including switches, wireless access points, fibre links, and VoIP phones.
- Run user registration and access permissions on the ZKTeco access control system, and keep it centralized instead of scattered across departments.
- Monitor and maintain the CCTV system — over 300 cameras across three branches and staff housing.
- Lead a team of five technicians, splitting daily tickets and training newer staff on our procedures.
- Deal directly with vendors when we need equipment installed, repaired, or ordered.
- Keep documentation up to date — network diagrams, configs, asset lists, so the next person isn't guessing.
- Support regional branches remotely when they can't wait for someone to travel out.
- Check system and network performance regularly and do preventive maintenance before things break.
- Standardized printer firmware and service schedules across the company, which cut down on downtime.
- Wrote a few Python scripts to automate the repetitive parts of monitoring and maintenance.

A few things I'm proud of

- Built the ICT infrastructure for a new oil plant from scratch — switches, wireless, printers, phones, all of it.
- Worked with an external team to extend fibre from Head Office out to the oil plant.
- Swapped in gigabit switches on the busiest wired segments, which noticeably cut down on lag for heavy users.

ICT Technician | *Hara General Services, Blantyre* 2019 – 2022

- Set up LAN networks and cabling for small business clients.
- Repaired printers and fixed network problems across different office setups.
- Trained users on basic IT use and put in place some basic cybersecurity practices.

Freelance ICT Specialist | *Blantyre* 2017 – 2019

- Set up internet connections for home and business clients — Starlink, Airtel, TNM, Globe.

- Diagnosed and fixed PC, network, and peripheral problems.
- Put together affordable IT setups for small businesses and individual clients.

Driver (Support Role) | *Hara General Services, Blantyre*

2016 – 2017

- Handled transport for staff and equipment.

EDUCATION

Applied Data Science: WorldQuant University — underway

BSc Information and Communication Technology: International College of Business and Management (ICBM), 2022
